slideSHOW™ DISPLAY SHELF

The **slideSHOW** Display Shelf is making its debut as the newest addition to Three by Three Seattle's innovative product line. With hidden grooves in the base, the shelves can be readjusted any time, making it as versatile as it is beautiful! Whether displaying a tall vase or a small collectible, the **slideSHOW** will fit in any setting and provide the perfect solution to tired displays.

"I've always loved mixing materials," says designer Gwen Weinberg. "Metal and wood is my favorite combination; the warmth of wood balances the sleek, practical nature of metal. I wanted to make a sophisticated, functional piece that fits in any wall space. The **slideSHOW** is the result."

The **slideSHOW** features a veneered plywood base and three powder-coated metal shelves that can freely slide side-to-side, making it an essential piece in keeping a home or office looking fresh and modern.

Available in ashwood with black shelves and walnut with white shelves.
18 x 15 x 2.5 inch
